

The Carbon Chronicle

Authorized as Second Class Mail, Post Office Department, Ottawa

VOLUME 32: No. 7

ACME, ALBERTA, THURSDAY, MARCH 19th, 1953

\$1.50 a Year; 5c a Copy

Mrs. Doris Saunders is a patient in the Drumheller hospital.

Mrs. D. A. Prowse and sons, Ronald and Garry are visiting relatives in Edmonton.

A card party sponsored by the Legion will be held in the new hall on Friday, March 27th at 8 p.m.

Miss Dorothy Langley spent the weekend at the home of her parents, Mr. and Mrs. G. C. McCracken.

Mrs. John Forsch was one of the first patients to be moved into the new wing of the General hospital.

Don Langley is now stationed on the H.M.C.S. Cornwallis in Nova Scotia and is getting along very well.

The ring which was rafted by the Legion at their dance Tuesday evening was won by Miss D. Aire of Calgary.

In the Farmers' Mixed Bonspiel, prizes were won by the following rinks:

HEREFORD EVENT

1. L. Coates.
2. C. Barnes.
3. C. Cave.
4. L. Halstead.

SHORTHORN EVENT

1. Stewart Hay.
2. George Appleyard.
3. J. Reid.
4. L. Brown.

ABERDEEN EVENT

1. D. Gordon.
2. B. Barnes.
3. F. Pierson.
4. Al Barnes.

The high school bonspiel began Wed., March 18th.

This weekend's storm has left many roads blocked, and March has developed into quite a lion after all.

A Home Cooking Sale will be held in the Legion Hall on Sat., March 21st. This is sponsored by the Carbon Students Union.

We regret being a little late with this issue of the Chronicle. The Drumheller School Division Annual Financial Statement which appears on page five of this paper sort of slowed us up.

MEAL OF IMPORTANCE

The meal carried in the lunchbox each day is an important one and should contain at least one third of the day's nourishment. It may be a problem to find sufficient variety in flavors and foods while still keeping a balanced diet in mind but with a little ingenuity the appearance of some of the old standby foods can be changed and different flavors substituted, so that they may be more appetizing. Try cutting sandwiches into different shapes. Children would enjoy squares and circles produced by cookie cutters. Varying fillings with cottage cheese tinted with cooking colors and containing raisins or scraps of fruit, fresh or dried, such as apples or apricots, would please youngsters. And the fruit add food values. The older lunch-carrier might prefer chopped onions, herbs, parsley or watercress. Fillings that are very nutritious include cheese, peanut butter, meat, fish or eggs. A vacuum bottle filled with hot chocolate or soup would be a welcome addition to any lunch. The bread should be whole wheat to provide added protein, minerals and vitamins.

IN MEMORIAM

PATTISON

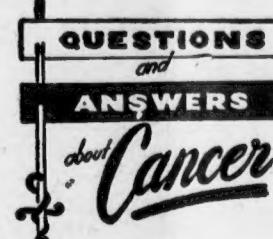

In loving memory of Mother, who passed away March 13th, 1950.

Ever remembered by Vi and Don.

The Big Annual Easter Monday Dance will be held April 6th in the Beiseker Memorial Hall.

The Junior Ladies' Aid will hold a Spring Tea and Apron Sale in the Legion Hall on Saturday, March 28th from 3:00 to 6:00 o'clock.

Elmer Litz Unreserved Auction Sale featuring an accredited herd of Registered Hereford Cattle and a full line of farm machinery will be held 3 miles north of Swalwell on March 25th. N. Boese and D. Peters, Auctioneers

QUESTION: How should cancer be treated?

ANSWER:

By surgery, X-ray, radium, or a combination of the three in the earliest possible stage of the disease, and, in rare cases, with special drugs.

YOUR RED CROSS WHAT IS IT DOING?

TO SAVE a life is this man's reason for giving his 77th blood donation. For many years this gentleman has been a "Good Samaritan" giving without charge his blood to whoever may have need of it. When the Red Cross Blood Transfusion Service started up he was one of the first to enroll as a regular donor.

All across Canada the Red Cross has inaugurated this life saving service. Canadians give and receive blood or plasma freely. In almost every hospital this precious fluid is saving lives and speeding recovery. Recently a hockey player in Saskatoon received some 10 transfusions because of a serious accident during a game. This was made possible through the Red Cross Service and there is no obligation to replace the blood or in any way pay for it. The funds for this and other services is secured during the Society's annual campaign for financial support.

Besides supplying free blood the Red Cross operates many other ser-

vices designed to relieve suffering and promote health among the people of Canada and elsewhere. In any case of human suffering the Red Cross stands ready to serve. This was dramatically put to the test when flood disaster struck Europe. Before the average person realized that a major disaster had occurred Red Cross had relief supplies on the way. These have been followed up with almost daily shipments of clothing and other essential to the victims. In the meantime local minor disasters have occurred and have been given the same kind treatment. Throughout all these extra disasters Red Cross carries on its day to day business of operating Outpost Hospitals, Nursing Stations, Veterans Services, Swimming and Water Safety, Mothers Milk Bank, Missing Persons found, Junior Red Cross, Women's Workrooms making clothing and a multitude of other services to individuals in trouble who cannot turn to anyone else but the Red Cross.

Canada's Standard Smoke

PEGGY

Funny and Otherwise

Some of these new model automobiles can do what some people cannot do—shift for themselves.

"I understand your husband has taken up the violin."

"Yes, and he's doing fine. They've returned his oil-can from next door already."

"Oh, doctor, I'm afraid my husband is losing his hearing. Sometimes I talk to him for hours and then discover that he hasn't heard a single word I have said."

"That's not an affliction, madam," replied the doctor, "that's a gift."

"Molly: 'Have you heard that Judy is engaged to an X-ray specialist?'"

"Clarice: 'Well, she's lucky. No one else could see anything in her.'"

The following sign was posted in an employee's cafeteria: This firm has 2,318 employees. To date this cafeteria has lost 2,318 pepper shakers. Now that you each have one, FOR HEAVEN'S SAKE, QUIT!

He was enlarging on the dangers of certain foods, and with a dramatic gesture he pointed an emphatic finger and innocent listener: "What is it? We all eat it at some time or other, yet it's the worst thing in the world for us. What is it, I say? Do you know?"

It appeared that the little man did know, for he replied in a husky whisper: "Wedding cake!"

The soprano, seeking an engagement, was finding the booking agent a trifle dubious.

"How many years in grand opera did you say?" he replied.

"Forty."

"My word, you must have known Madame Butterfly when she was a caterpillar."

A new father was looking at the babies through the window of the infant ward, and it seemed that every baby there was crying.

"Why are they bawling?" he asked the nurse.

"Listen," she said severely, "if you were only a few days old, without any clothes, out of a job, and owed the government almost \$1,700 on the national debt, you'd be bawling too!"

THRILLS of the S ROARIN' GAME

Those "Forgotten" Stones

(Contributed)

While curling at the Deer Lodge Club in Winnipeg some few years ago against George Kimberley of Kenora, his third man forgot to throw one of his stones. He asked me what he should do, and I answered, "Play the rock." George then asked if he himself could play the stone, and I said, "Sure go ahead."

He walked to the other end and, with hardly a glance, threw the rock through the house, remarking "That's the way forgotten stones should be played."

This same experience happened to us in reverse during the Winnipegs'spiel when Wilde of the Fort Garry Club insisted that we play a forgotten stone. With a possible five end in sight, we played the stone just about like George Kimberley did, only to have Skip Wilde, with his last stone, intentionally try to bump one of our stones in for shot.

These two incidents, especially the one with Kimberley, have made a deep impression on my thoughts and regard for my fellow man—for in our queer world we cannot go far wrong as long as we have men of like caliber among us.

**ASPIRIN
RELIEVES
PAIN AND DISCOMFORT OF
COLDS
FEEL BETTER FAST!**

More Comfort Wearing FALSE TEETH

Here is a pleasant way to overcome plate discomfort. FASTEETH, an improved powder, sprinkled on upper and lower plates holds them firmer so that they feel more comfortable. No gum or good, nasty taste or feeling alkaline (non-acid). Does not sour. Checks "plate odor" (denture breath). Get FASTEETH today at any drug store.

CARE OF HOUSE PLANTS
Plants, like animals, must have food if they are to grow and flourish. If the soil has been properly prepared, the food supply will last a long time, but a little fertilizer once a month will keep the plants in good condition. For a six-inch pot, use one-third of a teaspoonful of a complete plant food such as "Gardenite". Sprinkle it on the earth around the side of the pot, well away from the plant. Use fertilizer sparingly, strictly according to directions on the package.

FREE . . . if you are at all skeptical of its amazing merit send a 4¢ stamp for trial jar to Department "W", W. K. Buckley Limited, 559 College St., Toronto, Ontario.

How Scott's Emulsion Helps CHILDREN GROW STRONG, HUSKY!

More than
just a tonic

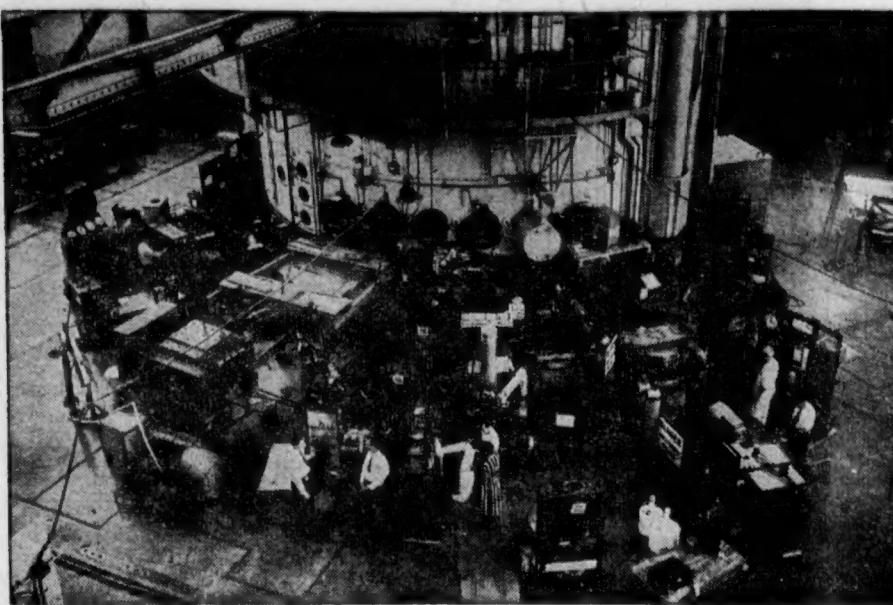

CHILDREN THRIVE on Scott's Emulsion. When they get run down, catch colds or get sick—see what a difference it makes when you give them Scott's Emulsion. It contains natural A & D Vitamins in natural oil—real "gold from the sea." Helps them maintain resistance. Helps them build strong bones, sound teeth, a husky body! Helps them grow into fine, sturdy, lively children you're proud of! Try Scott's and see!

SCOTT'S EMULSION IS RECOMMENDED BECAUSE
1. It contains natural A & D Vitamins in natural oil—plus added minerals. 2. Easy to take, economical. 3. Four times easier to digest than plain cod liver oil, because of exclusive process. 4. Helps children build strong bones, sound teeth, a sturdy frame.

Today—sure—get Scott's at your favorite store.

**TRY SCOTT'S EMULSION
HIGH ENERGY TONIC**

Atom Power is the "Equalizer" Of Small and Big Nations

The atomic furnace at Chalk River, Ont., Canada's major atom plant, produces nuclear isotopes for medical and industrial use. Though expensive, physicists say that similar atom plants for industrial or military purposes can be made by even small nations.—Central Press Canadian.

By FRANKLIN JOHNSON
(CPC Correspondent)

WASHINGTON.—So-called "smaller nations" are climbing aboard the atomic energy bandwagon so rapidly that AEC experts here are warning not to discount them in the atomic scene, particularly when it comes to development of peacetime uses.

The United States, Russia, and Great Britain—all apparently having exploded highly effective A-bombs and pushing ahead with hydrogen bomb research—naturally continue to dominate the atomic weapons race and seem to be in a league strictly of their own in that respect.

However, even in connection with A-weapons, some scientists have predicted from the start that the atomic bomb would do for nations what the firearm did for men—made them "all the same size" and relegated the Goliaths of sword and spear days to the dubious role of simply being bigger targets.

At this stage, however, all the smaller nations except Sweden apparently eschew military objectives, and are content with peacetime goals.

Gen. Bengt Nordinsskiold, chief of Sweden's air force, favors his nation "trying in every way to get hold of tactical atom bombs" for its defense. He contends that atomic weapons "have changed the entire picture of conducting war," and emphasizes the "giant-killer" role Sweden could play "with a few fighter bombers carrying atom bombs against an aggressor."

The practicality of smaller nations dabbling in atomic energy development recently was stressed by Dr. Gunnar Randers, director of the Norwegian-Dutch Institute on Nuclear Research, before a gathering of technicians at Belgrade university, Yugoslavia.

"The principle of an atomic pile is very simple," he explained. "An automobile engine is more complicated than an atomic pile." Dr. Randers said that mineral ore containing only .001 per cent. of uranium can be a relatively cheap source of "atomic fuel".

France already has placed its sec-

ond atomic pile in operation at the village of Saclay, near Paris, with the objective of strictly peacetime applications.

The German Federal Republic (West Germany) champs at the bit, eager to get into the atomic act just as soon as the four-power ban against it is lifted. Prof. Werner Heisenberg, a Nobel prize winner when he was only 31, has blueprints for the first German pile.

The famous Smyth report, chronicling development of the A-bomb in the United States, has just been translated into German and was a Christmas best-seller. Teutonic pride was hit by its revelation that Germany, instead of being on the threshold of atomic discovery, was eliminated from the race in 1942 when Hitler banned all research that could not produce specific results within six months.

Italy, another ex-Axis power, is spending \$100,000 for atomic research "on a shoestring," according to Ubaldo Loschi, its leading atomic scientist. He has denied reports that he created a hydrogen blast, but admits to having a new formula for generating atomic power.

Co-operation by smaller nations hold great promise for development in the opinion of Continental scientists, and the ten-nation European Council for Nuclear Research plans to establish a \$25,000,000 research centre, possibly near Geneva.

Meanwhile, Switzerland is striking out on its own, with three of its greatest engineering concerns launching a long-range program. Other

"smaller nations" in the running include India, where Prime Minister Nehru has announced a four-year atomic plan, and Australia, potentially a rich source of uranium, which is scouting possibilities of atomic power.

Mexico is setting up a large research laboratory at the University of Mexico, and United States and Brazilian scientists are collaborating on plans for development of atomic power in that nation.

But in Western hemisphere, Canada occupies a unique position. Virtually a partner of the United States and source of much of its uranium, Canada is building a \$30,000,000 pile to augment the two already operating at the big Chalk River, Ont., research centre.

GEMS OF THOUGHT

HEAVEN

The kingdom of God is within you.
—Christ Jesus.

Who seeks for heaven alone to save his soul may keep the path, but will not reach the goal; while he who walks in love may wander far, yet God will bring him where the blessed are.—Henry Van Dyke.

Sin makes its own hell, and goodness its own heaven.—Mary Baker Eddy.

The joys of heaven will begin as soon as we attain the character of heaven and do its duties.—Theodore Parker.

On The Side : By E. V. Durling

But Is It Worth It?

One of the world's greatest bridge players, Capt. Ewart Kempson, claims "women play cards better when in a ferocious mood." Keep that in mind, sir. If your wife is going to be your bridge partner, do what you can to make her angry before the game begins. By the way, sir, what is it you do that most irritates your matrimonial mate?

Remember the Nurses, Too

Have you experienced a serious operation during your life? Are you inclined to discuss it? Samuel Pepys, the immortal diarist, had one serious operation. For the remainder of his life he celebrated the anniversary of that operation and annually sent the operating surgeon a present. Keep this in mind if some surgeon saved your life. Celebrate the anniversary of the operation and send said surgeon a present. And don't forget the nurses.

Moral: Keep a Diary

Where were you on the night of Nov. 12, 1952? Over 100,000 persons were asked that question in Belfast, Ireland, during the course of an investigation of a murder case. One thousand detectives went from door to door asking it. By the way, sir, where were you on the night of Nov. 12, 1952? Perhaps we should all keep a daily record of our movements, with names of witnesses in case we are asked questions like that.

Definition of a Dogie

Queries from clients. Q. What is the definition of a "dogie" as in the popular song, "Get Along Little Dogies, Get Along"? A. According to the accepted cowboy explanation, a "dogie" is a little calf that has lost its mother and whose father has run off with another cow."

The Woman's Side Of It

"Ten years ago when we were married, my husband was tall, slender and really terrific. A handsome guy," writes a New Yorker. "Now he is a fatso type, bulging all over, including an extra chin. When I think of how he looks in a bathing suit, I shudder. I still have the figure I had when a bride. I rate whistles on the beach. Why don't you smug, self-satisfied males get on to yourselves? A man likes to be seen with a good-looking, well-formed woman; what makes you incurable male dopes think a woman doesn't take pride in being with a handsome man? It's a thrill for a wife to have somebody say, 'So that handsome man with you was your husband.' I had that said to me the first two years of my marriage, but not since. My erstwhile handsome heartbeat is now just another fat husband."

Ace Publicity Man

James S. Moran, highly imaginative press agent of the old school, first attracted attention by introducing a canary that could sing "Yankee Doodle". Subsequently he wagered he could find a needle in a haystack and won the bet. He also made good a claim he could hatch an ostrich egg by sitting on it.

Expensive Pastime

During the month before her marriage to the Duke of Windsor, Mrs. Wallis Simpson bought 107 dresses and 46 hats in Paris. On another occasion in New York city, the duchess bought 45 hats in one afternoon. No wonder she has won the title of the world's best-dressed woman 10 years in succession.

World Happenings Briefly Told

To foil holdup men, a "top secret" alarm device has been fitted to all British postoffice trucks that carry large sums of money. The driver also may lock himself in his cab by pressing a switch.

The former Anglican Indian school, a landmark in Prince Albert, Sask., for 40 years, has been sold to a Winnipeg contracting firm. Future disposition of the three-storey red-brick building was not announced.

The Orange Free State authorities decided not to relax the provincial ordinance which forbids angling on Sundays. The decision rejected appeals from anglers after one man was fined about \$10 for fishing on Sunday.

British Comet jet airliners now are being sold on five continents. Purchases were made by U.S. and Canadian airlines, Brazil and Venezuela, Japan and Australia, in addition to Britain and France.

The Swedish committee for relief to Germany's children estimated it had provided \$5,600,000 worth of assistance for German orphans, refugees and handicapped children. At present the work is aimed at helping refugee children from East Germany.

City authorities of Tokyo are making plans for the co-construction of a new super-airfield on the outskirts of the capital twice as large as the present international airport at Haneda. Engineers said the new airport will be built on 400 acres of land.

Terylene, the British wonder fabric, is to be made at the rate of 11 million pounds a year in a \$30 million plant which will be operating in about two years, at Wilton, south of the River Tees.

Investment in plant, equipment and housing in Canada last year increased by \$328,000,000 over 1951, it was estimated in a white paper tabled in the Commons by Hon. Douglas Abbott, finance minister.

Cut 300-Pound Roast From Mammoth

ALBUQUERQUE, N.M. — Indications of how prehistoric humans carved a cave-man's rib roast from a slain mammoth have been found on a ranch near Estancia, N.M. Officials at the University of New Mexico say a skeleton turned up by a plow proved to be that of a huge beast slain by Folsom hunters some 10,000 years ago. It bore indications that a 300-pound rib roast had been hacked out by some flint instrument. Folsom man is a prehistoric human believed to have lived in this area about 10,000 B.C.

HEALTH

Babies Are Born Nudists So Don't Overdress Them

Kicking around without clothes, uninhibited and carefree, babies may be the picture of contentment . . . until they learn about civilization and cold weather. Breaking them in to grown-up ways comes early, and the magazine Health offers some tips for the guidance of the newborn's nearest relatives:

Don't overdress the baby. Keeping a child too warm is apt to make him cross and uncomfortable. It may cause him to lose his appetite and affect his ability to adjust himself to temperature changes.

Tight clothing is not recommended for infants either indoors or out. Besides its tendency to restrict circulation and thus make it harder to keep warm, restriction of movement may bring with it psychological reactions as well.

Glowing pink is the right color for a baby's cheeks. If he loses his natural color it may be a result of his feeling cold; and if his face becomes flushed when he's lying outside in cooler weather it is well to bring him in and check up. Flushed cheeks can be a sign of trouble.

"Remember," adds the Health League of Canada magazine, "the individual needs of no two youngsters should be expected to be identical, and this applies to clothing just as it does to other parts of living. Every child should be dressed according to his or her own needs, and not according to what the neighbor's baby has on or what a mother-in-law or fussing aunt may think."

There's Something About A Yankee!

ST. PETERSBURG, Fla. — There's something about a sailor — and a Yankee, too!

The following advertisement appeared recently in help wanted section of the St. Petersburg Times:

"Waitresses: live in or out, good wages, excellent working conditions. New York Yankee baseball club will arrive in a few days. Some are married. Some are not. Call Mr. Hans, head waiter, Sorenco Hotel."

The Sorenco is the Springtime home of the Yankees.

Weekly Tip

VELVET

Hold the wrong side of the velvet over a boiling kettle, or rub it across the bottom of a hot flat iron which has been turned upside down.

The Italian European title looked safe until their unorthodox bidding system broke down on this hand at the end of the 1952 final.

When the Swedish East opened One Diamond, a barrage bid by South might have proved troublesome, but he preferred a mysterious call. Two Diamonds. West doubled, and South's bid of Three Spades came too late in the day—it was passed round to East, who rejected a double in favour of a well-judged Three No-Trumps. Eleven tricks were made for a score of 460.

In Room 3 the Italian East made a "Marmic" system pass, and South opened with Three Spades. Two passes followed, and East could only double for a one-trick contract. Sweden's gain of 5 match points proved a decisive blow.

Insurance Clerk
Wins \$303,000
Jackpot

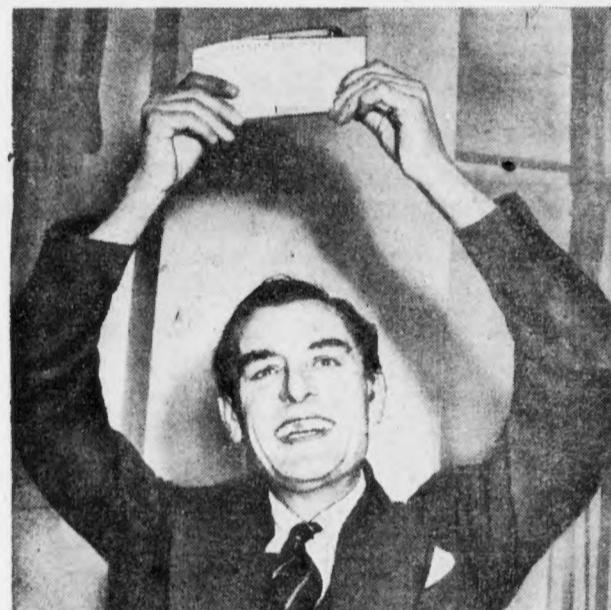

★★★★★ "Wild East" Drama Ends Happily

Thirteen-year-old Donald Reed, of East Bridgewater, Mass., hugs his pinto, Apache, after an adventure that makes cowboy thrillers seem tame. Here's the real-life drama in six acts: (1) Horse, startled by rabbit, throws Donald; (2) Horse runs out on railroad trestle and catches leg between ties; (3) Donald halts approaching freight; (4) Has railroad notified to stop train coming from opposite direction; (5) Tries to free horse which struggles and falls 25 feet into the river, plunging out of sight; (6) Horse rises to surface as Donald runs down bank, plunges in to shoulders and helps horse ashore. Curtain.

OPTIMISTIC? — Major General Chiang Wei-kuo, second son of Chinese Nationalist President Chiang Kai-shek, talks with newsmen after arriving in San Francisco. He declared that China was ripe for counter-revolution.—Central Press Canadian.

WINS \$303,000 DOUBLE JACKPOT — Jack Coulton, 41, a London, England, insurance clerk, happily holds up the cheques he received when he hit the jackpot in two separate football pools. They totalled 109,000 pounds, or \$303,000 in Canadian money—tax free. Coulton started filling in the pool forms three years ago, figured out a combination and stuck with it.—Central Press Canadian.

INSPECTS BATTLE LINES AGAINST SEA — Prince Philip is shown hatless and wearing hip boots during his recent tour of flood-stricken areas of southeast England. The duke paused to talk with one of the servicemen busy banking sandbags in one of the Sutton breaches at Lincolnshire. The sandbagged seawalls have held back the high tides.

JAP STUDENTS STUDY CANADIAN SHIP — While a small schoolboy, Y. Sakata, (right), industriously scribbles notes, Leading Seaman Yei-ji Inouye of New Westminster, B.C., and Guelph, Ont., explains some features of H.M.C.S. Crusader's emergency steering position. Leading Seaman Inouye's knowledge of the Japanese language came in handy when 187 sixth-grade pupils from Okubo primary school in Sasebo visited the Canadian destroyer while she was berthed in the port between Korean patrols. The children later wrote compositions about their tour.

DANGLES FROM PLANE 5,000 FEET IN SKY — Dangling from an airplane 5,000 feet up, and in 20-below-zero weather, Paratrooper Jim Bodner of Mission City, B.C., spent the longest half-hour of his life. His parachute gear tangled with the plane from which he jumped as part of the Canadian army manoeuvres at Fort Norman, N.W.T., and only after it was cut away was he able to parachute to earth. Doctors were amazed that he did not suffer severe frostbite.—Central Press Canadian.

TOP ARMY MAN IN THE SOVIET — Marshall V. Sokolovsky, who led the Russian forces in the capture of Berlin in the last days of the war, has been made commander-in-chief of the Soviet armed forces. He was in command of Berlin's East Sector at the time of the airlift and it was believed his policies forced the Western powers into organizing the airlift which kept Berliners from starving.—Central Press Canadian.

USEFUL COURSE
CALGARY — The fire department plans special courses to teach baby sitters what to do in case of fire. Certificates will be presented to the baby-sitters who complete the course which stresses evacuation of children from burning homes.

The heat generated by lighting a match reaches a maximum of some 2,700 degrees.

U.S. GETS PREVIEW OF CORONATION ROBES — A preview of coronation robes is being displayed to U.S. fashion salons by Doris Langley Moore, British founder and director of the London Museum of Costume. She displays not only gowns and robes that will be worn by peers and ladies of the realm, but costumes of periods dating back to the time of George III. The peeress gown modelled here has a red velvet kirtle with long train and ermine caplet attached. The peer's robe is of red velvet and, in keeping with tradition, he wears a sword. Both wear coronets.

NINE-MONTHS-OLD Billie Jean Simson plays with Kirk, German shepherd pet that recently dragged the tot from a burning house in Mendon, Mass. Mrs. James Simson, holding the baby, said the dog barked furiously to have the playroom door opened, ran inside and carried Billie out before she discovered that part of the house was on fire. Mrs. Simson then fled with her other two children.

Level Land

Mr. and Mrs. Theo Beckthold were in Calgary on Monday for business.

Do not forget the Red Cross in this district is still on. Your dollars are needed more than ever.

Mr. and Mrs. Benny Welch of Hanna were visiting over the weekend with their sister and brother, Mr. and Mrs. Alton Suczle and the S.D.A. Church.

Mrs. Carolina Leiske, the mother of the Leisks of this district left Tuesday night for Chicago, where she will be visiting for a month with her daughter, Mr. and Mrs. N. Taylor.

Mrs. Eva Schmitke of Vancouver, B.C., a sister of the Heuther brothers of this district was visiting over the weekend here. On Monday she left with Reinhold Huether for Olds, Lacombe, Le due, also Edmonton to visit with one of Mrs. Schmitke's daughters

Mr. and Mrs. Glen Triebwasser and Mrs. Lawrence Triebwasser were in Calgary Monday and Mrs. Triebwasser reports that her mother is coming along favorably in the Holy Cross hospital.

INTERESTED IN ECONOMY?

"Variety meats" is the term used by nutritionists to describe what many people consider very tasty and economical pieces—heart, tongue, liver, kidneys and brains. These can be made into very savory dishes, greatly favored by the people of many countries. These meats are rich in the nutrients necessary to health, even more so than some of the more expensive cuts.

MASTER MERIT AWARD IS WON BY LOCAL MAN

Mr. H. Neubauer of the Alberta Pacific Grain Company (1943) Limited at Beiseker, Alta., has gained the distinct honor of being numbered amongst those who have won the Elevator Master Merit Certificate. This is an award given by the Grain Insurance and Guarantee Company in recognition of outstanding proficiency in the maintenance of grain elevator premises. To earn this, an elevator agent must have a perfect record for a period of ten consecutive years.

Inspections of all plants insured by Grain Insurance and Guarantee Company are carried out by the affiliated Inspection Bureau Limited. This organization for the past twenty years has majored in the inspection of Grain Elevators, Flour and Feed Mills, etc., and its service is acknowledged as being rigid and exacting. Winning the award is therefore recognized as a definite achievement by the grain trade generally.

IN THE LEGISLATURE

By H. G. HAMMELL, M. L. A.

By H. G. HAMMELL, M. L. A.
On Friday of last week, the Premier, who is also the Provincial Secretary, brought in Alberta's largest budget of estimates of expenditures for the coming year. This will amount to 138 million dollars for general revenue and 35 million dollars for reserves which now amount to over 100 million dollars.

I shall deal with only a few of the main items as follows:

1. EDUCATION, will require 18 million dollars of this amount. Twelve million dollars will be spent for school grants and over 1½ million dollars for the University of Alberta. Additional aid will be given for the building of

QUESTION: How should cancer be treated?

ANSWER: By surgery, X-ray, radium, or a combination of the three in the earliest possible stage of the disease, and, in rare cases, with special drugs.

Know Cancer's Danger Signals—Send for free literature by writing:

If no train service April 1 take first available train.

Full particulars from any Agent

schools, but as the full details are not yet worked out I will leave this until later. This will mean the larger grants will be of considerable help to education

2. PUBLIC WELFARE will be allotted an increase of 7.3 million dollars. Under this will be a new Act to provide pensions for disabled persons, based on an extensive means test. This was provided for in one of 21 money bills introduced and given first reading in the legislature Tuesday.

A bill for which approval of the legislature is sought gives the government necessary powers to pay \$40.00 per month to "one who is suffering from chronic disability and is physically unfit for gainful employment."

Recipients of the pension must have lived in Alberta for at least ten years and must be 21 years of age or older. Not eligible are those unmarried persons whose income exceeds \$750.00, including the pension, or married persons whose income exceeds \$1200.00, including the pension.

Payments will not be made to those in receipt of pensions for the blind, the mothers' allowance, widows' pension, old age assistance or old age security.

Due to the lowering of the Old Age benefits to 65 years and as fifty per cent of this is paid by the Alberta Government as well as the Supplementary Pension of \$10.00, this item will have to be increased over last year.

PUBLIC HEALTH will provide aid to Arthritic sufferers by Government Assistance to aid those so afflicted under the age of 25 years. An increase of 83 thousand dollars over last year will be spent on the treatment of all Polio cases. The Minister of Health informed the House that it is believed a serum has been developed to prevent paralysis of all cases.

MUNICIPAL ASSISTANCE will be greatly increased this year. Grants to the Local Improvement Districts will be increased by one million dollars and Grants to Municipal Districts by over \$700,000.00. An extended bridge construction program will be made and this year should see a big improvement in the backlog of the past years.

A new policy will be set up by forming a revolving fund to handle all Municipal Borrowings on a lower rate of interest, thus keeping all this money in the province.

In regard to revolving funds, the Self-Liquidating Fund which with the addition of five million dollars this year will bring the total thus far up to 17 million dollars will be continued.

A new fund is being set up to give aid to worthy High School students to attend University.

PUBLIC HIGHWAYS will require about 47 million dollars this year. This will mean greater aid

to the Local Improvement Districts, Municipalities, and for new highways. The Minister in reporting to the legislature told of the five year plan in which it is intended to spend around 25 million dollars per year. Special attention will be paid to lateral roads and secondary highways.

Additional engineers will be available to the municipalities to assist them in their road work if requested.

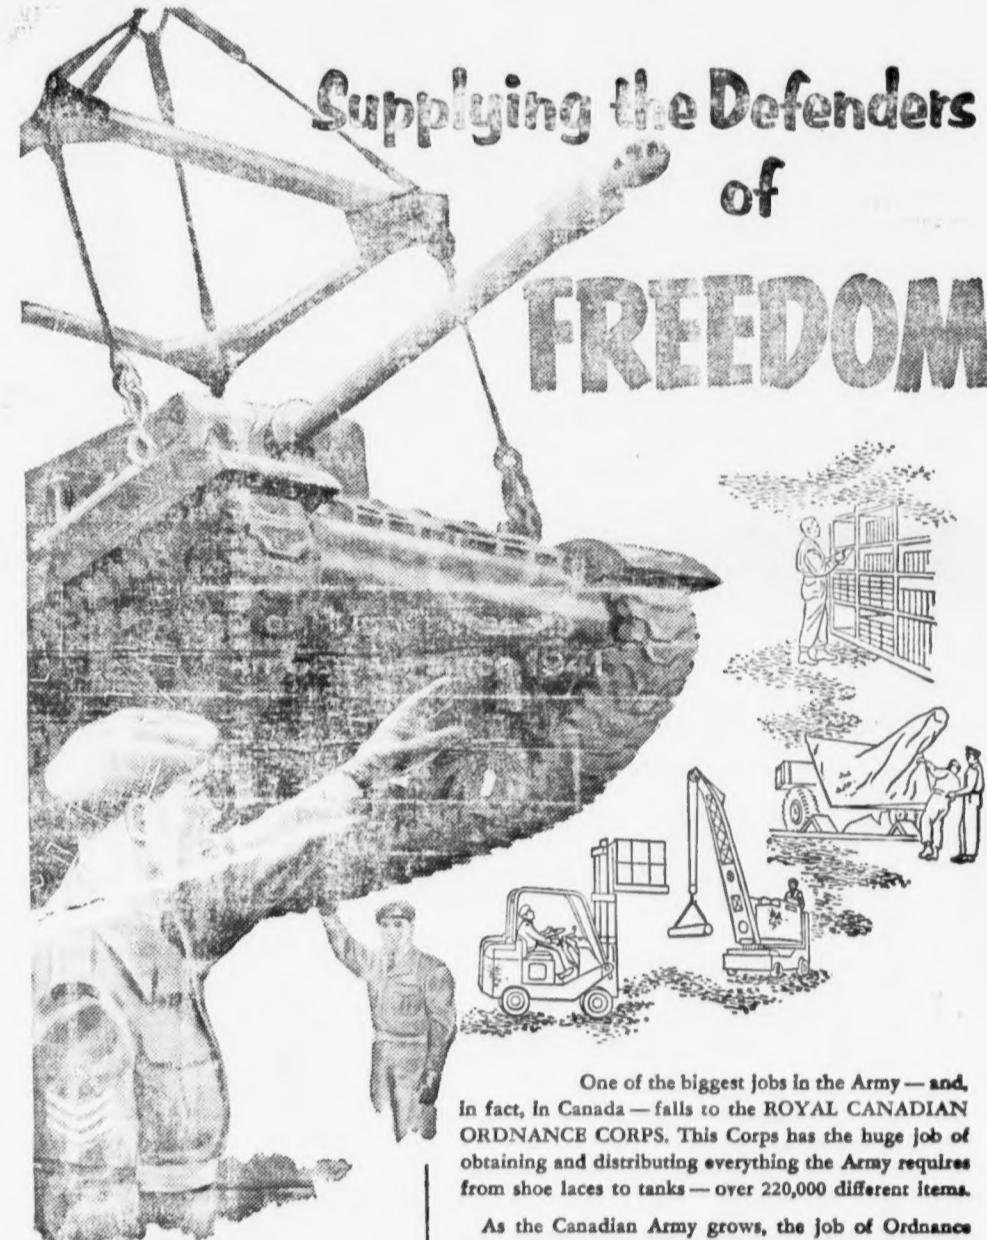

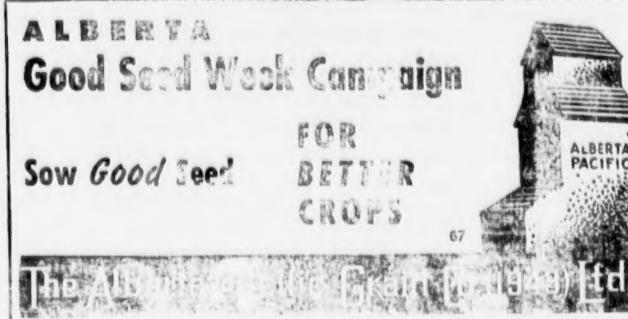

The Attorney-General has informed the house the new Liquor Act will be introduced next week so I hope to be able to give the full details of this very controversial matter.

MORE THAN A MILLION PASSENGERS CARRIED BY T. C. A.

A net surplus of \$807,879 after payment of income taxes was reported by Trans-Canada Air Lines in their annual report for 1952. The report, signed by G.R.

McGregor, President of the airline, marked a milestone in the Company's history when it noted for the first time the airline carried more than one million passengers in a single year.

A child needs Vitamin D from birth to the age of sixteen.

One of the biggest jobs in the Army — and, in fact, in Canada — falls to the ROYAL CANADIAN ORDNANCE CORPS. This Corps has the huge job of obtaining and distributing everything the Army requires from shoe laces to tanks — over 220,000 different items.

As the Canadian Army grows, the job of Ordnance grows. Right now more men are needed — men who can qualify as storemen, clerks, tailors, shoemakers and canvas workers. The Army will train men in any one of the many different trades and skills required by Ordnance. Once trained, the young man who serves in this Corps will find truly outstanding opportunities for promotions.

With general conditions of service, pay and pension plans at an all-time high, there are wonderful prospects for young men in Ordnance. Learn a trade and build an unusual and important career for yourself in the Royal Canadian Ordnance Corps.

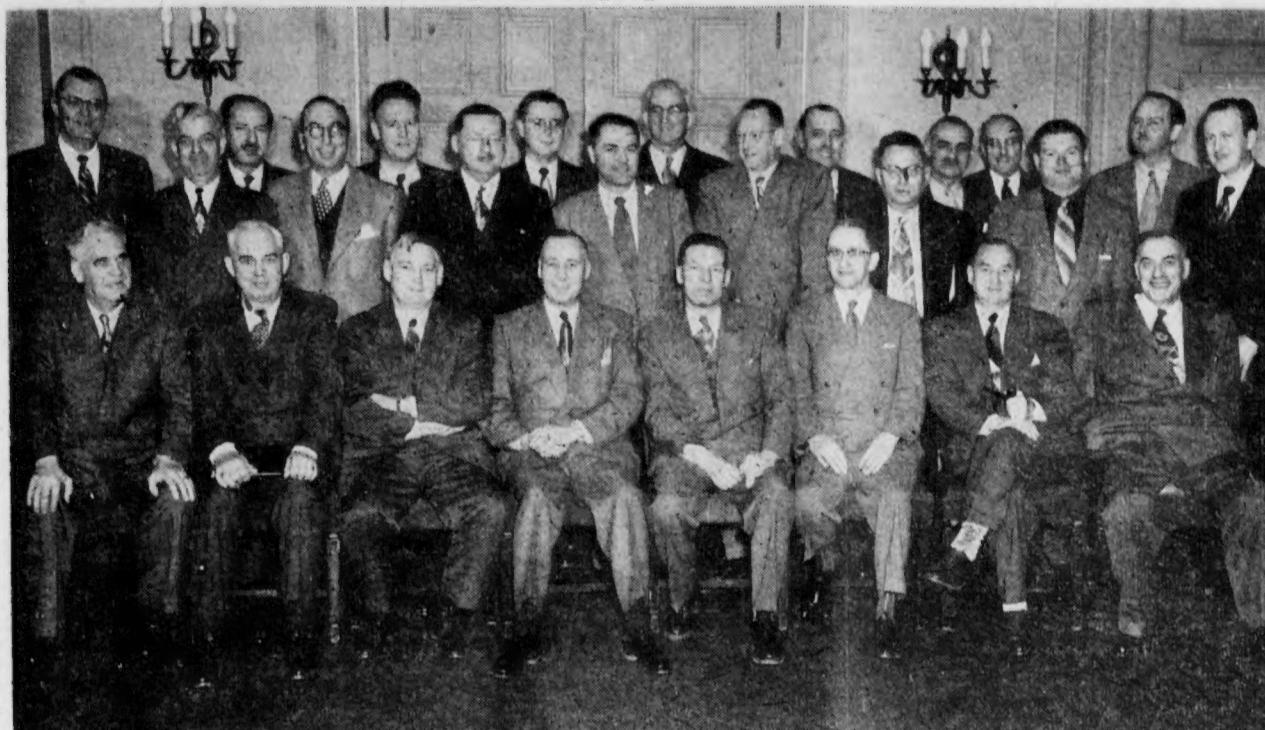

You are eligible if you are 17 to 40 years of age, tradesmen to 45, physically fit and able to meet Army test requirements. Applicants should bring birth certificate or other proof of age when reporting for interview.

Garden Notes

For Amateur Gardeners

INDOORS FIRST

The first plantings will be the seeds started in flats on the window sill or in hotbeds or green houses. These are sown early in March and by the time they are ready to transplant to permanent quarters outside they will be six to ten inches high. Things that should be started early in this way are those that if sown directly out of doors would hardly have sufficient time to mature or flower. Tomatoes, cabbage, peppers come in this category in the vegetables and petunias, zinnias, begonias and scores of other flowering plants.

Many gardeners in the cities and towns are able to buy these as started plants in flats from seedsmen or nurserymen. But in some cases, of course, this is not possible. Then again there are some gardeners who, to make certain of particular varieties, grow their own plants anyway. Where the garden is large and several hundreds of started plants are needed it is cheaper to grow one's own. In this case, however a hotbed is advisable. For the construction of these affairs one should consult a government bulletin. For starting seed indoors use a good mixture of sand and fine loam.

First planting outside will be very hardy things that are not afraid of frost and like to make their best growth in cool weather. Sweet peas are in this group, and grass seed and nursery stock. The latter is the trade name for young vines, shrubs and trees, ready for transplanting. One can hardly plant these things too soon.

WHEN SOIL IS READY

With trees and other nursery stock one can move or transplant when the soil is rather damp, but it is a mistake to do any general sowing or cultivating while the ground is the least bit muddy. Heavy soil is actually injured and later trouble results when it is dug or worked too soon. A good test is to take a little earth and squeeze it in the hand. If when released it crumbles but does not pack it is fit for the spade or plow.

GOOD SEED THE KEY

Too much emphasis cannot be laid on good seed. That means more than just high quality. It is seed of varieties especially selected and for Canadian conditions. In vegetables it also means that the variety has been approved and tested officially for Canada. As seed is the only factor in gardening over which one has absolute control, and it costs only a few cents, nothing but the best should be considered.

CONSTANT IMPROVEMENT

Last Spring, in three or four experimental grounds across Canada and in similar places in the northern part of the United States, certain seeds of vegetables and flowers were planted. Only a test number identified these new introductions of plant breeders from all over the world. Experts watched the results. They noted hardiness, freedom from disease, purity of coloring in flowers, quality in the vegetables, earliness and other points which make a plant suitable and valuable for our hardy climate.

On the basis of their observations these new introductions were approved or disqualified. The best of these, along with those of previous years will be listed in the Canadian seed catalogue this spring.

This is the way new developments in the garden world are introduced to the home gardener. In few other lines are the results of research, experiment and field trials made available so quickly for amateur or commercial use.

NEW BRITISH LAMP RIVALS THE SUN

Research scientists in Britain have produced what is believed to be the brightest lamp ever seen on earth. Brighter than the sun, the new flash type lamp gives almost 1,000,000 candles per square inch. The sun's brightness is about 800,000 candles to the square inch. Primarily produced to enable ophthalmologists to take colour photographs of the inside of the human eye, the lamp is already being used on many forms of medical research, including cancer study.

British Honduras in Central America produces chiefly mahogany and tropical fruits.

In 1919 it took a British dirigible 108 hours to fly across the Atlantic.

PRISCILLA'S POP—Agreed!

The metal thallium shows as a green line in the spectroscope.

WHAT KIND OF AN EXCUSE IS THAT! IT'S BEEN A BEAUTIFUL DAY!

New Variety Of Barley Licensed For Sale

SASKATOON. — "Husky" a new barley variety developed at the University of Saskatchewan after 15 years of breeding, has been licensed for sale in Canada, Dr. J. B. Harrington, head of the field husbandry department, announced. Formerly known as N x 1-11 (N times one dash eleven), it is a smooth-awned, six-row, white-seeded variety. The new variety is outstanding in yield and bushel weight, has good strength of straw and is rust-resistant.

This is the first important outcome of a barley breeding project begun at the university 15 years ago. Financial assistance was received in the early stages from the Canadian Malt Company and the United Grain Growers, and more recently from the Barley Improvement Institute.

The original objective of the breeding program was to produce a new variety satisfactory to the malting trade, the feed trade and for farm use. While the new variety is an excellent feed barley it is doubtful if it will make malting grades, said Dr. Harrington.

The new variety has shown remarkable performance in co-operation tests in western Canada. In each of the past three years "Husky" has outyielded standard varieties and hybrids being tested. In 120 field plot tests, in each of which every standard variety appeared several times, "Husky" outyielded the best feed barley "Vantage" by 10 per cent. Maturity is the same as "Vantage", mid-season to late.

The breeding program was begun years ago by Dr. Harrington and the testing and evaluation has been carried on by Prof. L. H. Shebeski since 1947.

Limited amounts of seed have been placed in the hands of selected, highly-experienced seed growers to obtain a maximum seed increase. "Husky" will not be available for general distribution until 1954, said Dr. Harrington.

Do You Know That...

Kangaroos are less than an inch long at birth.

Weeklies Are Closer To Readers

OTTAWA. — Daily newspapers are impersonal and apart while the local newspaper "really makes friends and influences people," Associate Defense Minister Ralph Campney said here.

Campney told the semi-annual meeting of the directors of the Canadian Weekly Newspaper Association that the daily newspaper's perform a very necessary and useful function.

There are 5,500 islands in Britain.

Goldfields, Boom Town, Is Being Moved To New Site

SASKATOON. — Goldfields, a ghost mining town since the northwestern Saskatchewan gold rush with which it was born petered out 10 years ago, now is being wiped off the map in the wake of the uranium rush. Remaining buildings in Goldfields, on the north shore of Lake Athabasca 500 miles north of Saskatoon, are being moved across the lake ice to the new, thriving town of Uranium City which sprang up 10 miles away last year during Saskatchewan's record uranium staking rush.

The move symbolizes the switch in importance in Saskatchewan from the "old minerals" to uranium. It also heralds the greatest year so far in the history of mineral development in the province.

In virtually every mineralized location north of the 55th parallel, hordes of prospectors and mining men are probing and listening for the uranium. Fabulous claims have been made for many discoveries and even more startling reports are likely to be made as knowledge of more recent finds becomes public.

Near Uranium City, in the 500-square-mile Beaverlodge uranium field, two mines are scheduled to go into production early this year, one by the federal Crown corporation, Eldorado, and the other by a private company. Discoveries in the area will be proved up after the snow goes.

Just north of the 55th parallel, similar activity is forecast for properties near Lac La Ronge, farther east and 130 miles north of Prince Albert.

Between Lac La Ronge and Athabasca lies the chain of narrow waterways known as the Foster lakes.

Here, according to sketchy reports leaking out of the area, Saskatchewan is likely to find rich mineral deposits.

Uranium ore is reported in addition to deposits of cobalt, zinc, copper, gold and silver.

The area's nearness to Lac La Ronge—it is only 113 air miles from the northern settlement—indicates that it may be of more importance to the province than the Beaverlodge field, which is really accessible only from Waterways, the end of steel just across the border in Alberta.

Before any diamond drilling is done, claims have to be probed and trenched and samples of ore analyzed. The results must show that the claims are rich enough to warrant expenditure of many hundreds of thousands of dollars in drilling programs.

Already, since it became important late last year, more than 900 claims have been staked in the Foster lakes area. The major holdings are by Eldorado.

Vasco Numez de Balboa discovered the Pacific ocean in 1513.

Clearing Tips For Goalkeepers

In modern hockey many goals are scored from rebounds during pressure play around the goal. When, as is often true today, three or four opponents are within a few feet of the goalkeeper, he must be a combination wizard and acrobat to clear the puck safely.

To control the rebound as much as possible, use your hands either to catch the puck or trap it against the body or pads, the stick kick when such a play is suitable, and keep a soft touch on the stick except when clearing the puck to the side, and behind the goal if possible.

The clearing play should be made as soon as possible after the shot has been made so that no attacker can break in quickly for the puck. The clearing move in which the puck is moved away with a sweep of the stick should be made the same as a pass with the blade of the stick following through along the ice after the puck has been moved. Don't jab at the puck.

If the foot is used to clear, the puck should be moved away with a sideways sweep of the foot so that the whole length of the blade is behind the puck. Never attempt to kick the puck with the toe of your skate. Some goalkeepers can clear well with one foot but are very awkward with the other. Make sure you practise until this weakness is overcome.

If you have any time to figure out where your clearing movements should be made, you should clear towards the side of the net to which there is a teammate.

The most important general fundamental of good clearing is keeping calm, cool, and relaxed. The goalkeeper who lets himself get tense and excited when surrounded by attackers will often make a bad move. At such times, the goalkeeper should check carefully on his muscle tension and try to loosen up his body if he feels himself growing tense and upset. Keep relaxed.

Dribbling Don'ts—Basketball

If you are to become a really good basketball player you must learn when to dribble the ball. If you pay special attention to this part of your game you will gain many valuable advantages that will help you play better basketball and thus help your team. Now, here are some dribbling don'ts to keep in mind:

1. Never dribble if you can make a good pass to a teammate.
2. Never dribble with your head down—keep it up and always be looking for a chance to pass the ball.
3. Never hog the ball by unnecessary dribbling—this will spoil your team play and make you unpopular.

Finally, never try to dribble the ball through two or three opponents—you will likely lose possession.

Fatty Fallacy

Now, more than ever before, the detrimental effects of excess weight on athletic activities are being investigated by physical educators. They have found that there is a general belief in the fallacy that extra weight means added power and strength, and that this extra weight was especially important in such body contact games as football and hockey. Don't you make this mistake. The leaner you are the faster, more agile, and alert you will be, plus the fact that your endurance is greatest when you carry no extra weight.

The old bogey of distance has been licked, he said, and the northland's inaccessibility now is a thing of the past. The airplane had solved "the insoluble problem" of distance.

Canadian Fashion

Black batiste crepe is used by Bill Mintz of Trend to style this Canadian dress which has a full taffeta-lined skirt. The separate softly draped front forms a cowl and stands away from the bodice. Two wings of appliqued velvet are sewn in at the neckline.

North Has Infinite Possibilities

YELLOWKNIFE, N.W.T. — Canada's northland has "infinite" economic and social possibilities, the governor-general said in this buoyant mining community in the Northwest Territories. And, he added, its romantic appeal is not overstated.

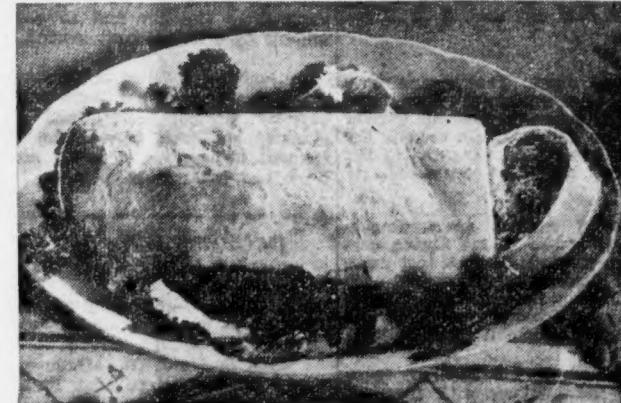

Rt. Hon. Vincent Massey said in a prepared speech to the Yellowknife Board of Trade and the Canadian Institute of Mining and Metallurgy that the north "now is revealing itself as a land where it needs only energy, determination and ingenuity to build large and thriving communities."

The old bogey of distance has been licked, he said, and the northland's inaccessibility now is a thing of the past. The airplane had solved "the insoluble problem" of distance.

REDEEM STAMPS

OTTAWA. — Canadian banks have taken on the job of redeeming unused excise stamps whose use on cheques was abolished by the new budget, the Finance Department reported.

:- APPETIZING RECIPES :-

Above: A different Lenten main course is this Salmon Roll. Spread flaked, canned salmon on

a rectangle of biscuit dough, roll up, and bake.

Salmon Loaf

Three quarters cup bread crumbs, 1 egg, slightly beaten, $\frac{1}{4}$ cup milk, 2 cups flaked salmon, 3 tbsp. fresh lemon juice, $\frac{1}{2}$ tsp. salt, $\frac{1}{2}$ tsp. pepper, 2 tbsp. finely chopped onion, 2 tbsp. melted butter.

Combine ingredients in order given. Pack firmly into buttered loaf pan or individual baking dishes. Bake in moderate oven, 350 degrees F., about 40 minutes.

Remove from oven and pour over the following Lemon-Butter Sauce. Serve hot.

During their seventh season in the League, Richard only played 16 games in his first semester with the Habituants, which actually means he tallied Goal No. 200 during his sixth complete season.

Howe, the rawboned Detroit ace, is only 24, and became the youngest player in history to score 200 goals in the N.H.L. Richard was 27 when he tallied his 200th. Howe broke into the National League at the age of 18, while the Montreal Canadiens' star was 21 when he played his first game in the N.H.L.

An Unusual Situation

Although Sid Abel is the playing coach of the Chicago Black Hawks, he is unable to argue an official's decision while he is on the ice. Only the captains and alternate captains are allowed to talk with the officials. Therefore if Abel wishes to complain about something while he is playing, he must make the beef through one of his captains or else go back to the players' bench and yell from there. When he is on the bench his rights as a coach prevail.

Four Regulars Scoreless

There are four regulars in the National Hockey League who have yet to score their first goal this season. All four are defensemen, and they are Jim Thomson, Toronto; Bob Goldham, Detroit; Benny Wolt, Detroit, and Bob Armstrong, Boston.

Helpful Hints

A drain will not clog if, about once a week, three or four tablespoons of soda are placed at the opening of the drain, then washed down the pipe with boiling water.

Try using a flour paste instead of tacking the new piece of oilcloth to the kitchen table. It will prevent cracks and wrinkles, will last longer and looks nicer.

If you notice a thin place, runner or hole in the stocking, darn it before washing it. This will prevent the hole from becoming larger during the washing process.

Do not put the bread or cake away in the tin box used for this purpose until it is thoroughly cooled, or it will become soggy and heavy.

To remove iodine stains soak the stained area in two cups of warm water and soap suds, in which one tablespoon of household ammonia has been mixed.

TRY AND STOP ME!

By BENNETT CERF

Home from college for a weekend, a freshman told his father, "I've landed my first part in a campus production. I play a man who's been married for 20 years." "Good work, son," enthused the father. "Keep that up and the first thing you know they'll be giving you a speaking part."

A direct mail wizard explained the pulling power of his "bargain" catalogue: "Man is the only animal that can be skinned more than once."

Quick Canadian Quiz

1. How high is Niagara Falls?
2. Direct taxes on corporations in 1926 took 8.4 per cent. of profits. What is today's percentage?
3. In 1951 how many people died in Canadian road accidents every 24 hours?
4. Name the one Canadian city with more men than women.
5. Are more Canadians employed in agriculture, construction, manufacturing or mining?

OUR COMPLETE SHORT STORY—

PARTY LINE

Jim Said, "I've Never Seen Such Brown Eyes, Lena Is A Funny Name." :: By Charlotte McCarthy

THE phone shrilled suddenly, drowning out the ticking of the old clock, and filling the kitchen with its clamor. Three long and one short. This call was for the new family which had moved recently to the old farm across the valley. Doris had been fairly burning with curiosity and her father had brought the welcome news from town that there were several daughters . . . one around her own age.

Dad had said, at the supper table last night, that she should go over and visit the new folks; let them know that they had moved to a friendly neighborhood. But she thought that she would wait until her mother got her new voile dress finished. Not that she wanted to show off, but someone had seen the oldest daughter at a party and had mentioned that she was real stylish.

Wouldn't it be nice if the one about her age would start keeping company with Bart Stewart, Jim's best friend, and then the four of them could go on picnics together? For instance, when the young men started playing baseball, as they always did in Mason's meadow between haying and harvest, the two of them

could sit on the fence and watch, while Bart and Jim played, instead of listening to the older women talking of pickling and preserving.

Funny that she hadn't seen Jim in the last few days. Probably busy on his potatoes. She took Jim for granted now, and yet she could still remember how embarrassed and proud she had been the first night he had walked her home from church. Everyone knew that he was her steady fellow, and around here that was as good as an engagement. Only once had she heard of a couple in the valley breaking up after "going steady." That was Irene Deans and Herb Bell . . . he had taken up with a strange girl from town. Irene, who later married a widower from Cedarville, still played the organ in Sunday school. Doris often wondered how she had ever lived it down.

The phone rang again. This time, one long and two short . . . Jim's home. On an impulse, she ran across and eased off the receiver. Evidently Bart was calling. "How'd you make out at the new people's place last night? You picked the one I liked, too."

Bewildered, she heard Jim's voice: "The old man didn't want to listen at first. Seems she's pretty young, and he wanted to keep her around. I've never seen such brown eyes. Lena is a funny name . . ."

Well, she had to find out and the sooner the better. Doris replaced the receiver softly.

"What are you moaning about?" Her mother's voice was tired but cheerful, an anchor in a lost world. "Seems like those weeds grow in a dozen different directions at once." She pushed the battered hat back from her damp forehead, where a strand of greying hair winged in the brown, and smiled at her daughter. "Mum." It was a desperate plea. "Could you and Dad spare me to go to work in town for awhile? I've got to go. Honest!"

"What would Jim have to say to that?"

"What's it got to do with Jim? It's no business of his!"

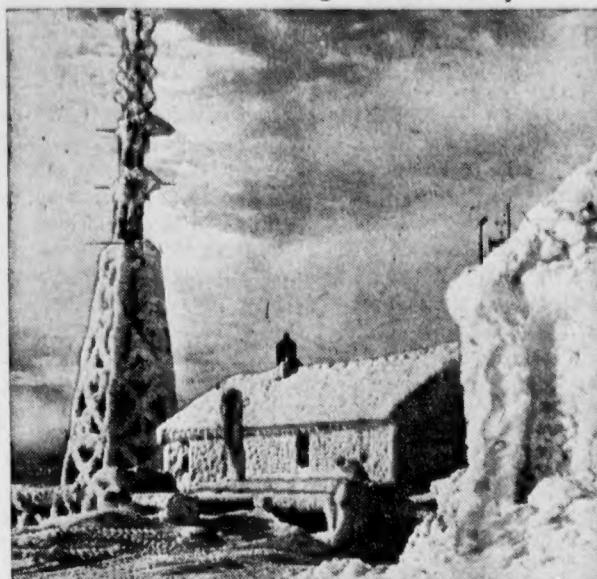

At the stark misery in the young eyes, the older woman turned quickly. "Don't you worry, honey. If you're that set on going, your Dad won't say a word."

"Guess I'll get the cows. The flies down in the pasture were chewing them to pieces when I got them last night." She patted her mother's shoulder with gentle awkwardness. "I'll just hate to leave you and Dad."

Going down the path, the tears she could no longer keep back splashed on the front of her dress. Summer was almost over, and the wild roses by the fence were fading fast; their velvety petals, like ghosts of broken dreams, drifting softly to rest.

After the chores were finished, Doris huddled miserably on the back porch. A single star shone over the poplar on the hill, and an owl hooted its eternal question from the grove beyond. Suddenly the lithe, square-

Nature a Testing Laboratory

Overall view of the ice-encrusted buildings atop Mount Washington in New Hampshire, where icing tests are made on U.S. air force jet engines. Winds here have reached a velocity of 231 miles per hour, and the temperature a low of 46.5 degrees below zero. —Central Press Canadian.

shouldered form of Jim Porter loomed out of the dusk, and dropped on the step beside her.

"I have news for you, Jim. I've decided to go away to work soon, and meet some new folks. I don't intend to spend the rest of my life in the valley."

"Why, Doris!" He peered through the gloom. "I'd always figured you and I'd be married. I even had a surprise for you. That new man has a herd of Jerseys and I bought a little beauty from him . . . sort of cream colored, with the biggest, brownest eyes. He tried to sell me an older cow, but somehow I thought you'd like this one. Name's Lena though I guess it doesn't matter what her name is."

The star was suddenly very near . . . and breath-takingly beautiful. "Oh, but it does matter, Jim." Her hand was warm on his arm, where the smooth muscles rippled under the skin. "It matters a whole lot what the cow's name is!"

SASKATCHEWAN BOASTS
RADIO-ACTIVE HIGHWAY

REGINA. — Existence of what is probably the world's only radio-active highway was disclosed to members of the Saskatchewan Legislature.

James Ripley (L-Athabasca) told the Legislative public accounts committee that two truckloads of uranium ore from a uranium mine in the Lake Athabasca area were mistakenly dumped into a highway for fill.

The highway is 13 miles long and leads from the uranium mines to the shipping docks on Lake Athabasca, in the northwest corner of the province.

MOST FAMOUS VIKING
Ragnar Lodbrok, son of Sigurd Ring, king of Sweden in the Eighth century, is generally regarded as the most famous of all Vikings.

BACKACHE
May be Warning

Backache is often caused by lazy kidney action. When kidneys get out of order, excess acids and wastes remain in the system. Then backache, disturbed rest or that tired-out and heavy-headed feeling may soon follow. That's the time to take Dodd's Kidney Pills. Dodd's stimulate the kidneys to normal action. Then you feel better—sleep better—work better. Get Dodd's Kidney Pills now. 51

RABIES

FOURTH IN SERIES ON RABIES

By DR. E. E. BALLANTYNE
Director of Veterinary Services
Alberta Dept. of Agriculture

BITE MAIMS—

Rabies is chiefly contracted through bites, but may occasionally be contracted through fresh skin cuts or scratches or contamination of mucous membranes such as those of the eye, with saliva of the infected animals. This is an important fact for trap pers to remember. They should not skin wolves, etc. that were definitely rabid unless gloves are recommended so that they can be effectively disinfected after skinning the animal. The knife should also be disinfected or

boiled. The eyes should not be rubbed with the gloves. The best advice is not to handle or skin these animals at all.

The virus has a special liking for the central nervous system, travelling from the point of bite by way of the nerve sheaths to the brain. Not all rabid animals excrete the virus of rabies in the saliva all the time which may ex-

plain why only about one person in eight will develop the disease even if no treatment is given. So uncertain is this situation, however, that all persons bitten should receive the treatment.

While minor cuts and scratches of less than 24 hours duration will permit the entrance of the virus into the body, large, deep and ragged wounds are the most serious. The virus does not penetrate the unbroken skin. Bites

about the head are always very serious, as the virus has a very short distance to travel to the brain. Hence, no time should be lost in taking intensive treatment. If treatment is delayed a fatal condition may develop.

Bites through clothing are less serious than those to the bare skin as the saliva may be absorbed by the cloth. Rabies virus may be present in the saliva a few days before the animal shows symptoms of the disease and also may survive in the brain tissues many days after the death of the animal.

The virus is readily destroyed by drying, boiling or exposure to sunlight. It is dead in a matter of a few hours in the saliva after the animal dies. This is of importance to trappers as no person yet has developed rabies from

handling furs. The only danger is at the time of skinning around the head as explained above. Chemicals such as 3 percent ceresol will destroy the virus in 15 minutes. The care of bites is explained below.

WHAT TO DO WITH PERSONS EXPOSED

First, get a detailed and accurate history of the actions, symptoms and behaviour of the animal that did the biting. Without such a history it will be difficult at times to determine whether the animal is rabid and whether anti-rabic treatment is indicated.

In cases of bites or scratches from a suspected rabid animal the family physician should be called promptly. In districts where a doctor is not available, report bites to the local public health nurse, veterinarian, For-

est Ranger or R.C.M.P. so that arrangements can be made to get medical attention. The bite or scratch should receive prompt attention though. A shallow wound should be washed with soap and water (preferably 20 percent soft soap) for 15 to 20 minutes, changing the fluid frequently. Following this, tincture of iodine should be applied in liberal amounts. Deep and torn wounds should be treated similarly, except a syringe should be used to force fluid down into the depth of the wound repeatedly. Remove as much fluid as possible and force Tincture of Iodine into the depths of the wound.

When a doctor becomes available he will determine what other steps are necessary, such as the use of antirabies vaccine, called the Pasteur treatment. It

ENTIRELY NEW *Through and Through*

Illustrated — Chevrolet "Two-Ten" 4-Door Sedan

—WITH MORE GREAT IMPROVEMENTS THAN ANY OTHER LOW-PRICED CAR!

Entirely New in Appearance with . . . New Fashion-First Bodies by Fisher. Here are more new models (16 of them!) . . . more beautiful and more comfortable bodies (take a look and a ride!) . . . and more color-choices (22 dazzling single-tone and two-tone combinations!) . . . than ever before in Chevrolet's history! And, in addition, Chevrolet's entirely new Fashion-First Bodies by Fisher bring you even richer and roomier color-matched interiors and even sturdier Unisteel construction, for your greater safety-protection!

Entirely New Durability. New, stronger, more rigid construction imparts even greater durability and dependability to a car long famous for these qualities.

Entirely New in Performance with . . . New 115-h.p. "Blue-Flame" Valve-in-Head engine*. Chevrolet offers this powerful, gas-saving high-compression engine in all Powerglide models, together with the Economizer rear axle; and a new 108-h.p. "Thrift-King" Valve-in-Head engine in all standard gearshift models.

New Power — New Acceleration — New Passing Ability. You'll find that the new Chevrolets, with either of these two great new engines, bring you more power, increased acceleration and greater passing ability, as well as sensational new economy.

New, Even Finer Powerglide Automatic Transmission*. Chevrolet's famed Powerglide Automatic Transmission, coupled with the new 115-h.p. engine and Economizer rear axle, gives even finer, fleeter no-shift driving at lowest cost.

New Extra-Easy Power Steering. Greatest advance in driver comfort since the introduction of automatic transmission. Gives finger-tip steering-ease and parking-ease . . . reduces driver fatigue. (Optional on all Powerglide-equipped models at extra cost.)

Entirely New in Convenience with . . . New Center-Fold Front Seat Backs (in 2-door models) for easier entrance and exit; New Master-Key Control with combination starting and ignition key switch;

New Automatic Choke on all models; and new larger rear-deck opening for easier loading and unloading.

Entirely New in Comfort with . . . New Curved One-Piece Windshield. New Crank-type Regulators for Ventipanes. New Foot-Form Clutch and Brake Pedals. And the softer, smoother Knee-Action Ride.

Entirely New in Safety with . . . New Finger-Fit Steering Wheel. Improved Velvet-Pressure Jumbo-Drum Brakes. Shade-Lite Tinted Glass (optional at extra cost). And Safety Glass in windshield and all windows of sedans and coupes.

Entirely New in Economy, too . . . Yes, all new Chevrolets for 1953 bring you more miles per gallon of gas — more over-all economy of operation — and, in addition, they're the *lowest-priced line* in their field! Come in — see and drive this great new car at your earliest convenience — and you'll know it's the car for you.

*Combination of Powerglide automatic transmission and 115-h.p. "Blue-Flame" engine optional on "Two-Ten" and Bel Air models at extra cost. (Continuation of standard equipment and trim illustrated is dependent on availability of material.)

MORE PEOPLE BUY CHEVROLETS THAN ANY OTHER CAR!
